15. Support Contact & Official Store Listing p. 8

2.1 What is PlafondChèque Maroc Pro?

PlafondChèque Maroc Pro is a financial management and cheque scheduling application tailored for Moroccan businesses and individuals. It lets you set a **daily cheque ceiling in Dirhams (DH)**, record issued or scheduled cheques, and automatically split large payments across consecutive Moroccan banking business days so your daily ceiling is never exceeded.

Who is this application for?

- **Merchants & wholesalers** who want clear daily cash-out control without manual spreadsheet errors.
- **SME owners & accountants** managing cheques across Moroccan banks (Attijariwafa Bank, Banque Populaire, Bank of Africa, CIH, BMCI, Crédit du Maroc, Al Barid Bank, CFG Bank, Crédit Agricole).
- **Users of all generations** thanks to the clean **5-button home launcher**.

Local Storage & Complete Data Privacy

- **100% Offline-First**: all financial records and cheque photos remain stored locally on your device (IndexedDB + 3-second auto-save).
- **No external cloud servers**: no bank login is required and no financial data is ever sent to third parties.
- **Cryptographic protection**: PBKDF2-SHA256 (120,000 iterations) PIN lock and AES-256-GCM encrypted backups.

CHAPTER 3 · GETTING STARTED

First Steps: 6-Step Interactive Onboarding, Language & Daily Limit

When you launch the app for the very first time, a **6-step interactive onboarding guide** opens automatically (if you are upgrading an existing installation that already contains cheque records, your data is preserved and onboarding will not interrupt you).

1. **Select your language (Step 2/6)**: tap **Français** 🇫🇷 (default), **العربية** 🇲🇦 (switches immediately to full right-to-left RTL layout), or **English** 🇬🇧. Your choice is saved immediately even if you tap *Skip*.
2. **Set your daily financial ceiling**: on the home screen, the top card displays your active daily limit (e.g., `10,000,000 DH / day`). Tap **Modify** to adjust your ceiling at any time.
3. **Navigate via the 5 large icons**: tap any of the 5 main sections (*Add Cheque*, *Calendar*, *Cheques*, *Dashboard*, *Reports*) and use the top-left **← Home** button to return to the launcher.

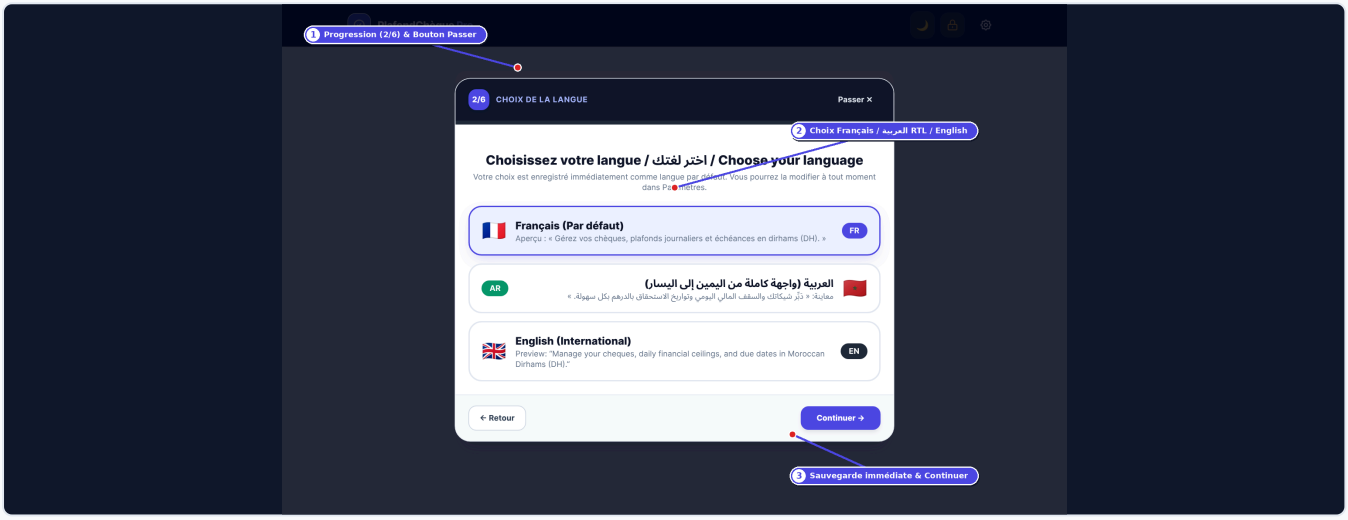

Figure 3.1 — Interactive first-launch language selection (1: French default, 2: Arabic RTL, 3: English, 4: Continue).

CHAPTER 4 · TREASURY MONITORING

Dashboard Explanation & Green / Yellow / Red Capacity Indicators

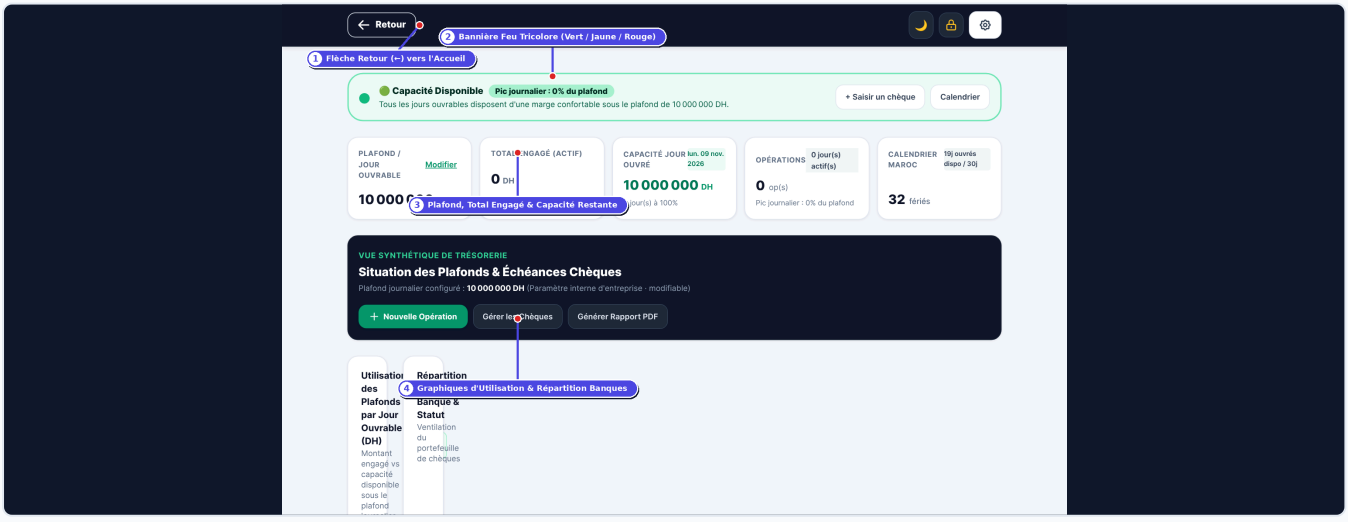

Figure 4.1 — Financial Dashboard (1: Back to Home, 2: Traffic-light status banner, 3: Committed amount, 4: Remaining capacity).

The **Dashboard** (opened via the blue *Dashboard* icon) displays the key metrics for your selected date at a glance:

Dashboard Metric	What It Means	Visual Indicator Thresholds
Daily Ceiling	Maximum cheque amount allowed per Moroccan business day (in DH).	100% Baseline
Amount Committed	Centime-exact sum of active cheques scheduled on that date.	Excludes cancelled cheques
Remaining Available	Available margin before reaching your daily limit (Ceiling − Committed).	**Green < 80%** **Yellow 80–99%** **Red 100%**
Active Cheques & Deadlines	Total tracked cheques plus upcoming maturities and overdue alerts.	Immediate warning if overdue

CHAPTER 5 · RECORDING & SPLITTING CHEQUES

Adding a Cheque in 4 Simple Steps & Attaching Cheque Photos

Chapter 5

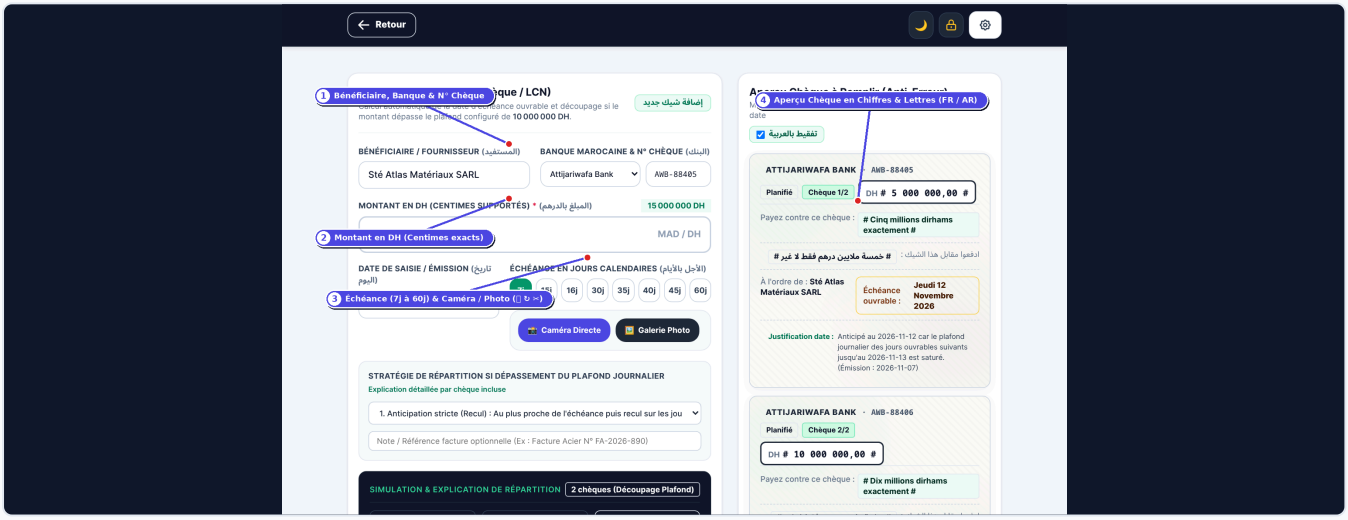

Figure 5.1 — Adding a cheque (1: Beneficiary & Number, 2: Amount & FR/AR words, 3: Photo & crop, 4: Automatic split preview).

- **Step 1 (Beneficiary & Bank)**: enter the beneficiary's name, pick one of the 9 Moroccan banks, and enter the cheque serial number (e.g., `AWB-88405`).
- **Step 2 (Amount in DH & Written Words)**: type the amount (e.g., `15,000,000` or with centimes `12540.75`). The app instantly converts the amount into written words in both **French** and **Arabic** so you can fill out the physical cheque accurately.
- **Step 3 (Issue Date, Target Term & Notes)**: select the issue date and desired term. If the target date falls on a Saturday, Sunday, or Moroccan holiday, the app automatically shifts it to the next valid business day.
- **Step 4 (Cheque Photo & Split Preview)**: capture a photo with your camera or upload an image, use ↻ **Rotate 90°** and ✂️ **Crop to Cheque Aspect Ratio**, review the automatic multi-day split table if the amount exceeds a single day's remaining limit, and tap **Save Operation**.

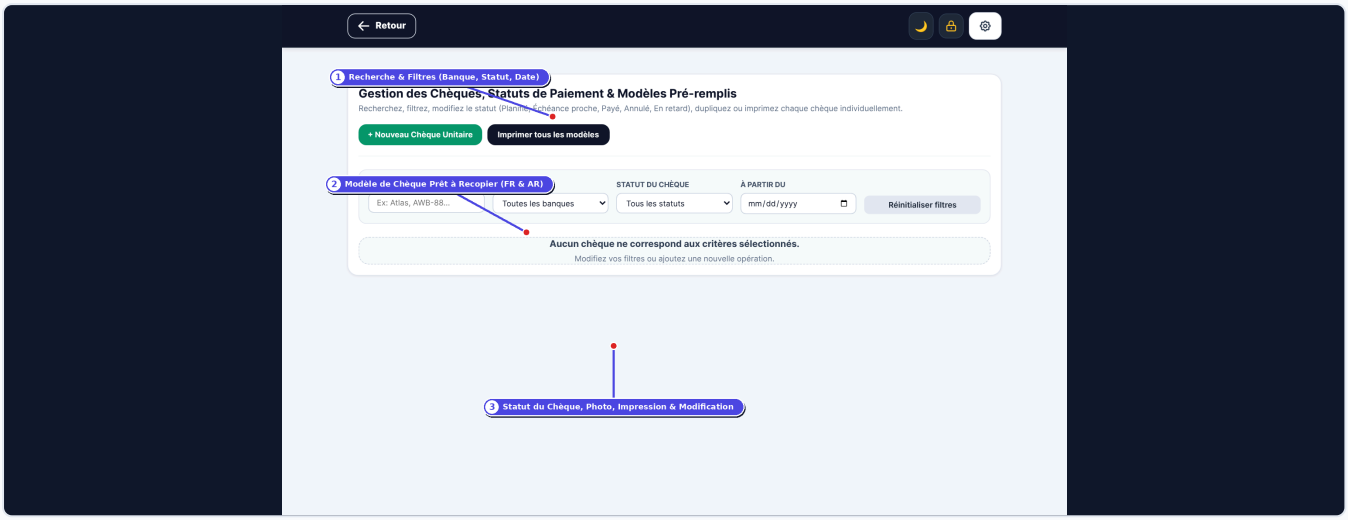

Figure 6.1 — Managing cheques (1: Moroccan bank template selector, 2: Search & status filter, 3: Realistic cheque card & actions).

In the **Cheques** section, every cheque or split tranche is rendered as an interactive Moroccan bank cheque card:

- **Update Status (9 lifecycle statuses)**: *Planned (Pending)*, *Issued / Delivered*, *Cashed / Paid*, *Postponed*, *Cancelled* (immediately frees the daily ceiling on that date), *Returned / Unpaid*, *Replaced*, *Partial Payment*, or *Disputed*.
- **Edit Date or Cheque Number Inline**: change the cheque number or scheduled date directly on the card. The engine immediately checks available capacity on the new target date.
- **Delete with Confirmation & Audit Log**: a confirmation prompt prevents accidental deletion and logs the event in the local audit trail.

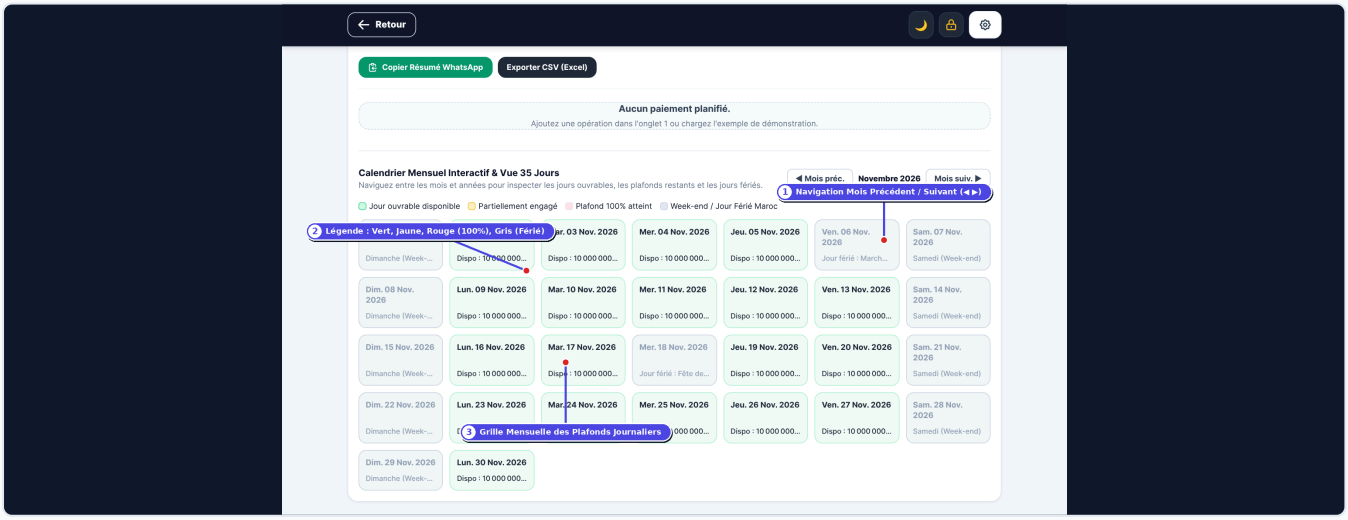

Figure 7.1 — Smart Calendar (1: Quick filters, 2: Green/Yellow/Red day badges, 3: Remaining capacity & scheduled cheques per day).

How to Read Calendar Day Colors

- **Green Day (Available)**: less than 80% of the daily ceiling is committed. Safe for scheduling new cheques.
- **Yellow Day (Partially Occupied)**: between 80% and 99.9% of the ceiling is used. Approaching your limit.
- **Red Day (Fully Occupied 100%)**: ceiling reached. Any additional cheque is automatically routed to the next available business day.

Moroccan Working Days & Holidays

- **Weekends excluded**: Saturdays and Sundays are automatically skipped during cheque scheduling.
- **National & Islamic holidays included**: Independence Manifesto, Labor Day, Throne Day, Green March, Independence Day, and Islamic holidays (Eid Al-Fitr, Eid Al-Adha, Mawlid, 1st Muharram — customizable in Settings).

Financial Reports: Daily, Weekly, Monthly, By Bank & A4 PDF / CSV

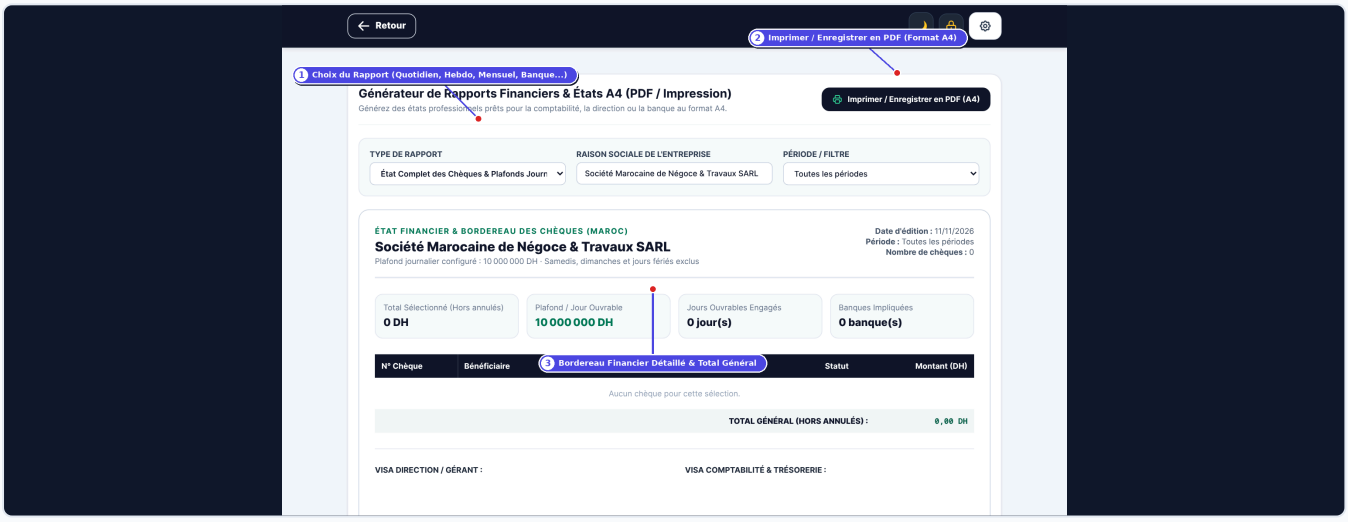

Figure 8.1 — Financial Reports (1: Period & bank selector, 2: Bank-by-bank breakdown, 3: A4 PDF print & Excel CSV export).

The **Reports** section helps you review your financial activity and share clean statements with your accountant:

- **4 Report Horizons**: view *Daily*, *Weekly*, *Monthly*, or *All-Time* summaries with automatic totals by Moroccan bank and cheque status.
- **Print A4 PDF Statements**: tap **Print / A4 PDF** to generate a clean A4 summary table ready for physical filing or signature.
- **Export Excel-Compatible CSV**: tap **Export CSV** to download a UTF-8 BOM CSV file that opens cleanly in Microsoft Excel with full French and Arabic character support.

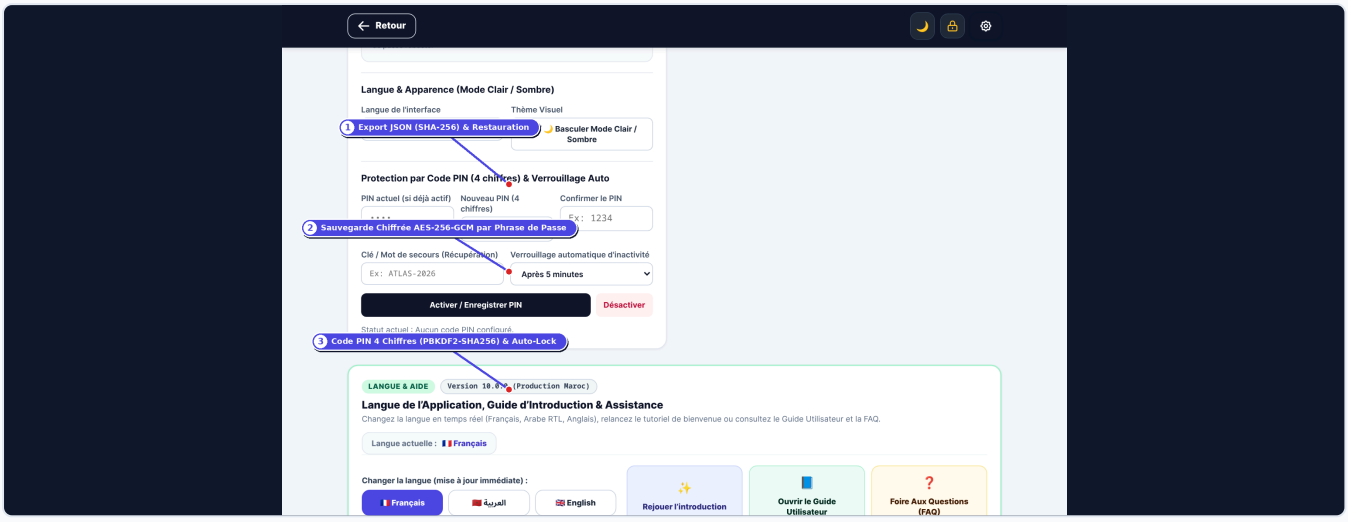

Figure 9.1 — Security & Backup (1: PBKDF2 PIN Lock, 2: AES-256-GCM encrypted backup export, 3: Validated backup restore).

Automatic Local Save Every 3 Seconds: You never need to press a manual "Save" button while working. Every change is automatically saved to your device's local storage.

- **Exporting a Backup Before Switching Phones**: open **Settings ⚙️ → Backup & Restore**, enter a backup password, and tap **Export Encrypted Backup (.pcmbackup)** (protected with AES-256-GCM authenticated encryption) or **Export JSON**.
- **Restoring a Backup**: tap **Import / Restore File** and select your `.pcmbackup` or `.json` file. The application verifies data integrity before restoring your records.

10. Security & Privacy: 4–8 Digit PIN Lock (Chapter 10)

- **Enable or Change Your PIN**: in **Settings ⚙️ → Security & PIN Lock**, enter a 4-to-8-digit PIN and tap **Enable / Update PIN**. Your PIN is hashed locally using **PBKDF2-SHA256 (120,000 iterations)**.
- **Automatic Idle Lock**: select an inactivity timeout (1, 5, 15, or 30 minutes) or tap the top-right lock icon 🔒 to lock the screen immediately.
- **Brute-Force Lockout & Data-Preserving Recovery**: after 5 failed attempts, a 30-second cooldown is enforced. If you forget your PIN, tap *Forgot PIN?* on the lock screen to unlock using your **8-character Recovery Code**, your **Encrypted Backup Password**, or a confirmed security reset.

11. System Notifications & Due-Date Reminders (Chapter 11)

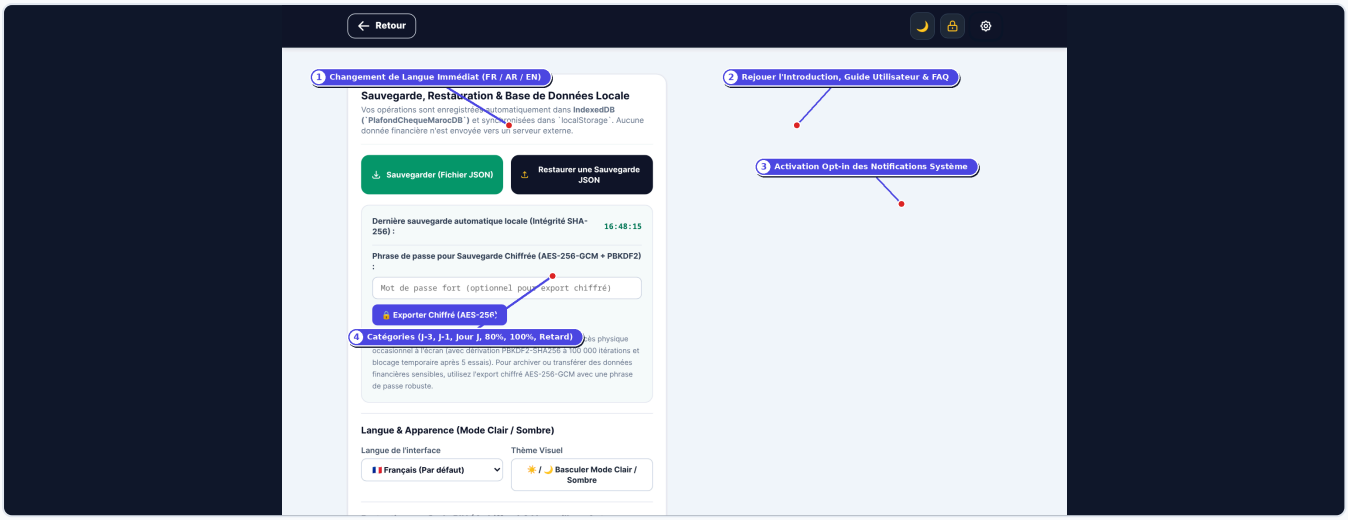

Figure 11.1 — Language & Help card (1: FR/AR/EN pills, 2: Replay Onboarding / Manual / FAQ) and OS Notification controls (3 & 4).

- **Permission Requested Only When You Enable It**: the app never prompts for OS notification permission on launch; it asks only when you toggle **Enable System Notifications** in Settings.
- **6 Configurable Alert Categories**: reminders **3 days before (D-3)**, **1 day before (D-1)**, **on the scheduled cheque date (D-0)**, daily ceiling alerts at **80%** and **100%**, and **overdue cheque** alerts.
- **Lock-Screen Privacy Protection**: by default, notifications hide sensitive cheque amounts and beneficiary names unless you explicitly enable detailed notifications. Tapping a notification opens the exact cheque or calendar date.

12. Settings, Language & Built-In Help (Chapter 12)

Open **Settings** ⚙️ at the top right to access the **Language & Help (v10.0.0)** card:

- Switch instantly between **Français** 🇫🇷, **العربية (RTL)** 🇲🇦, and **English** 🇬🇧, and toggle **Dark Mode** 🌙 / **Light Mode** ☀️.
- Tap 🔄 **Replay Introduction**, 📖 **Open User Manual**, or ❓ **View FAQ** anytime inside the app.

CHAPTERS 13 & 14 · PRACTICAL ASSISTANCE

Troubleshooting Guide & Frequently Asked Questions (FAQ)

13. Troubleshooting Common Situations (Chapter 13)

Issue	Likely Cause	Step-by-Step Resolution
Forgot PIN Code	Forgotten 4–8 digit PIN.	On the lock screen, tap *Forgot PIN?* and enter your **8-character Recovery Code** or your encrypted backup password to unlock without losing any cheque records.
Notifications Not Appearing	OS permission denied or battery saver blocking background alarms.	Verify that notifications are enabled in *Settings* → *Notifications*, grant permission in Android/iOS/Browser settings, and tap *Test Real System Notification*.
Backup Import Failed	Incorrect password for a `.pcmbackup` file or corrupted file.	Double-check the password used during encryption or import a valid `.json` backup. Existing data remains untouched if an import fails.

Issue	Likely Cause	Step-by-Step Resolution
Camera Permission Denied	Browser or phone blocked camera access.	Use the *Upload Image from Gallery* button or enable camera access in your device settings.
"Daily Ceiling Exceeded" Warning	Cheque amount exceeds remaining capacity on the selected day.	This is normal behavior: the engine automatically splits the excess across the next available Moroccan business days.

14. Frequently Asked Questions — FAQ (Chapter 14)

Q1. Is my financial data sent to the internet?

No. All cheque records, photos, and settings are stored locally on your device.

Q2. What happens when a cheque exceeds my daily ceiling?

The engine automatically splits the amount across consecutive Moroccan banking business days so no single day exceeds your ceiling.

Q3. Why are certain dates skipped automatically?

The app respects the Moroccan banking calendar by skipping Saturdays, Sundays, and official national/Islamic holidays.

Q4. How do I free up capacity when a cheque is cancelled?

Open *Cheques* and change its status to **Cancelled**: that day's ceiling capacity is restored immediately.

Q5. Can I switch between French, Arabic, and English anytime?

Yes, via first-launch onboarding or *Settings* → *Language & Help*, with full RTL layout support for Arabic.

Q6. How can I replay the welcome guide?

Go to *Settings* → *Language & Help* and tap **Replay Introduction**.

CHAPTER 15 & STORE APPENDIX

Support Contact Information & Official App Store Listing (EN)

15.1 Official Support Contact Fields (Editable Publisher Placeholders)

Complete the bracketed publisher fields below with your official business contact details before distributing the manual or publishing on Google Play and Apple App Store:

Contact Field	Publisher / Owner Information Placeholder
Company / Publisher Name	`[Company / Publisher Name]`
Technical Support Email	`[Support Email Address]`
Phone / WhatsApp Support	`[Phone / WhatsApp Number]`
Business Mailing Address	`[Business Mailing Address]`
Recommended Support Hours	Monday to Friday: 09:00 – 18:00 (Morocco Time, GMT+1)

15.2 Official Google Play Store & Apple App Store Listing (English Version)

The visual assets in `Google_Play_Store_Screenshot_Package.zip` (`1080×1920` px 9:16 portrait and `1024×500` px feature graphic) and `Apple_App_Store_Screenshot_Package.zip` (1290×2796 px iPhone 6.7"/6.9" portrait and `1024×1024` px icon) comply with Google Play Console Specifications, LaunchShots Play Store Guidelines, and Apple App Store Connect Specifications.

App Name & Short Description (Max 80 characters)

App Name: PlafondChèque Maroc Pro — Cheque & Daily Limit Manager
Short Description: Track cheques, daily DH ceilings, and Moroccan banking business days offline.

Full Store Description (Google Play & Apple App Store)

PlafondChèque Maroc Pro helps merchants, SME managers, accountants, and individuals in Morocco organize their cheques and manage their daily financial ceiling in Dirhams (DH) with clarity and ease.

- **Simple 5-Icon Navigation**: jump straight to Add Cheque, Smart Calendar, Cheques, Dashboard, or Reports.
- **Daily Ceiling Tracking & Automatic Splitting**: monitor committed amounts and remaining capacity with Green, Yellow, and Red indicators, and automatically split large cheques across consecutive business days.
- **Moroccan Banking Calendar**: automatically skips weekends (Saturday/Sunday) and Moroccan national and religious holidays.
- **Cheque Photography & Written Amounts**: displays amounts in words in French and Arabic, and lets you attach cropped cheque photos.
- **A4 PDF Reports, Excel CSV Export, PIN Lock & OS Reminders**: 100% offline local storage protected by PBKDF2-SHA256 PIN lock, AES-256-GCM encrypted backups, and full French, Arabic (RTL), and English support.

Keywords: morocco cheque, daily ceiling, cheque manager, treasury, banking calendar, dirham, accounting, reminders.
